(a) mass of the particles
mass in matter m^*/m
equal rates
rates 1 : 2 : 3
deflation clock τ_d
(b) energy per particle
energy per particle minus m (units m)
collisionless, equal
collisionless, 1 : 2 : 3
relaxed state
deflation clock τ_d
(c) pressures, rates 1 : 2 : 3
pressure / energy density
pressure along
$x0, \ldots, x3$
$x5$
$x6$
$x7$
deflation clock τ_d
