(a) growth of the modes
growth exponents Re σ / gsum
wavenumber k / gsum
m_bos = 0
m_bos = 0.3
(b) frequency of oscillation
frequency Im σ / gsum
k / gsum
m_bos = 0
m_bos = 0.3
m_bos = 1
(c) the field of a static source
field / [e^τd/(k² + m²_bos)]
τ_d = gsum x4 since switching on
k² + m²_bos = 1, gsum = 0.2
k² + m²_bos = 0.25, gsum = 0.2
k² + m²_bos = 1, gsum = 1
k² + m²_bos = 4, gsum = 0.5
